

MAKE A LLAMA HOLLOWFACE

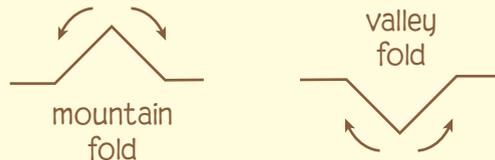

Fold this llama to create an amazing optical illusion!

WHAT YOU'LL NEED:

- Llama hollowface printout
- Scissors
- Tape or glue

INSTRUCTIONS:

1. Cut out the llama and base. Carefully cut the dotted lines along the llama's body, mane and face.
2. Now, practice making the 2 types of folds used in this project: mountain and valley folds.

Mountain Fold: Folding the paper down to create a peak, looks like the letter A.

Valley Fold: Folding the paper up to create an indentation, looks like the letter V.

3. Starting at the llama's head, find the notch and line near the nose. Fold along this line, creating a valley fold. Find the line on the llama's snout and create another valley fold.
4. Find the line at the top of the llama's head above the eye and fold towards you. The nose should now be facing to the right. You have also created a right angle at the llama's nose.
5. Make a valley fold at the A and B tabs. Secure the A and B tabs in place by taping or gluing them to the back of the llama's head.
6. Using a mountain fold, fold up the llama's ear and mane.
7. Now you're ready to fold the base so the llama can stand up. Find the solid lines along the llama's body and in the leaves. Fold the C and D flaps in towards the back of the llama in a mountain fold and fold in the F and G tabs.
8. Then, fold up the bottom flap along with its E tab.
9. The flaps and tabs should fit together forming a base that allows the llama to stand up. Affix the F and G tabs to the flaps with tape or glue.
10. You're all done! Place the owl on a flat surface, close one eye, and move side to side to observe the cool hollow face illusion!
